

ID	Description	Notes
01	This row demonstrates a wrapped description that spans multiple lines while keeping only the bottom border visible.	Bottom border only
02	Short text on the left, but the middle cell is long enough to wrap naturally and prove the border stays at the bottom.	First line Second line Third line
03	Another multiline example with enough words to create a tall row in the description column.	The whole table uses only bottom borders for each cell.
